PROJECTS

Stön: Recipe Notes

<https://github.com/brthomiu/Ston-Pizza-Notes>

Technologies: TypeScript, React, Redux, Node, Express, MongoDB, HTML, CSS

- Platform built to help cooks develop and share new recipes.
- Enables users to publish new recipes, browse and search recipes, and like their favorite recipes.
- Features TypeScript type interfaces to validate API requests and database schemas, preventing unexpected errors.

Task List

<https://github.com/brthomiu/Full-Stack-Task-List>

Technologies: JavaScript, React, Redux, Node, Express, MongoDB, HTML, CSS

- Application that enables users to keep track of items in a to-do list.
- Each task list is private and secured with authentication middleware that tokenizes user data.

Movie Lookup

<https://github.com/brthomiu/Movie-Lookup>

Technologies: JavaScript, React, HTML, CSS

- Web application that lets users browse and search a database of movies.
- Features search functionality and dynamically generated filter tags.
